THE DETAILS MAKE US BETTER

Our doors and drawers feature **solid wood stiles and rails**, with an MDF center panel, the preferred construction for painted wood.

Drawers and doors have **mortise and tenon joint construction** for strength and durability.

The 6-way adjustable **soft-close hinges** allow doors to close silently and smoothly.

3/4" thick plywood shelf has six finished sides and four metal shelf clips to withstand heavy items.

Concealed **quick-release door hinges** for swift and easy door removal for complete interior access.

Interior **metal support brackets** reinforce corners and create a stable and long-lasting foundation.

Solid natural wood drawer box is constructed using four corner dovetail joints, the strongest joints used in cabinetry.

Our concealed under-mount **6-way adjustable drawer glides** offer full extension, ensuring easy access to every corner of the drawer, even its deepest parts.

Matching interior and exterior finishes for a flawless look.

The **3/4" plywood box panel** construction is 50% thicker than industry standards.
